

DRIVING TECHNOLOGY SYSTEMS

**WE PROVIDE SMOOTH
DRIVING EXPERIENCES.**

**„WE GET INVOLVED EARLY
IN THE PLANNING PHASE
OF YOUR PROJECT AND
WORK OUT ECONOMIC, AS
WELL AS TECHNICAL
SOLUTIONS WITH REGARD
TO EFFICIENCY AND
MAXIMUM USABILITY.“**

3 FIELDS OF APPLICATION

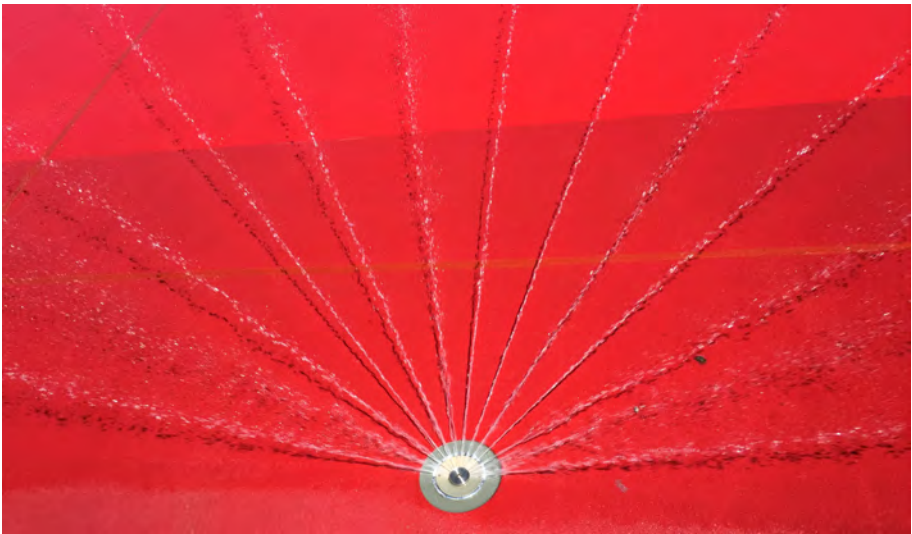

for technology that moves.

Proving Grounds

technologies & systems, such as

- ▶ EFD - Evertz Flow & Drain
- ▶ ESD - Evertz Spray & Drain
- ▶ EFN - Evertz Flat Nozzle

for homogeneous roadway irrigation.

- + Bosch Flat Rock PG, Michigan, USA
- + MAN PG Ankara, Turkey
- + Toyo Tires PG Indija, Serbia

Drive Safety Centers

technologies & systems, such as

- ▶ ESS - Evertz Standard Sprinkler
- ▶ EVS - Evertz Vario Sprinkler
- ▶ EWO - Evertz Water Obstacle

best suited for safety training.

Driving Experience Centers

technologies & systems, such as

- ▶ EOC - Evertz Overflow Channel
- ▶ ECI - Evertz Curb Stone Irrigation
- ▶ EHS - Evertz Head Stream

as basic for your driving experiences.

LOCATION MAP

Always on course.

ROADWAY IRRIGATION

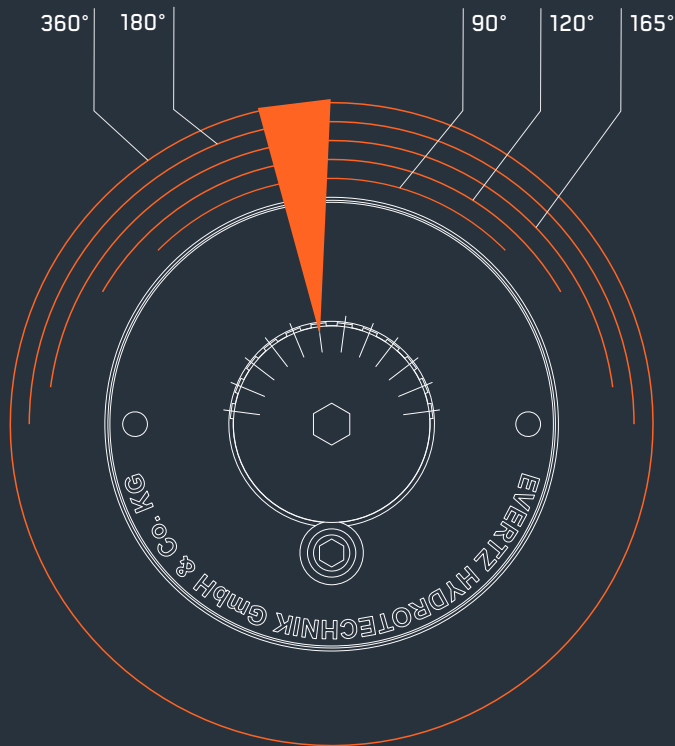

Sprinkler systems & line irrigation.

360°

DRIVING EXPERIENCE. With our sprinkler- and line irrigation systems, every application area is well taken care of.

All systems are ready-to-install modules that are integrated flush with the road surface and are designed for both car and truck operation.

CUSTOMIZED DESIGN. We offer the possibility to develop irrigation systems individually tailored to your application. Our in-house test facility invites you to test and optimize the developed systems together with us.

ESS Evertz Standard Sprinkler

- + different spray angles
- + pressure-based throw width
- + homogeneous irrigation of mostly straight tracks with low slope and geodetic height

EVS Evertz Vario Sprinkler (patented)

- + different spray angles
- + spray width individual adjustable on installed sprayer
- + homogeneous irrigation of winding tracks with varying slopes as well as large geodetic differences in elevation

ESD Evertz Spray & Drain

- + sprinkler ESS or EVS integrated in channel
- + intelligent use of the channel for irrigation as well as drain
- + even line irrigation
- + gutter system ready-to-install

EFD Evertz Flow & Drain

- + variable spray width; extremely short spray width for irrigation up to the edge of roadway
- + intelligent use of the channel for irrigation as well as drain
- + even line irrigation
- + channel system ready-to-install

EOC Evertz Overflow Channel

- + gutter elements ready-to-install
- + even irrigation e.g. for slope tracks

ECI Evertz Curbstone Irrigation

- + in curbstone integrated sprayer
- + homogeneous irrigation of winding tracks

COMPLETELY FROM ONE SOURCE

We are your contact when it comes to complete services.

EWO EVERTZ WATER OBSTACLE

Safety.

- + system ready-to-install (modular design)
- + safe 24V-system
- + length: min. 2m; arbitrary extendable in 2m-steps
- + 8x Vario-Light-Jet per 2m-element
- + jets manually adjustable
- + spray height matched to the application
- + other versions possible

PUMP STATION

Efficiency.

- + frequency-controlled pumps (submersible pumps wet well installation; centrifugal pumps dry well installation; well pumps)
- + customised pump layout
- + filter systems (filter stations; self-cleaning automatic filter; filter screens)
- + measurement systems (level measurement; flow measurement; flow meter; dry running protection)

MASTER PLAN

Features.

- + dynamic skid plate
- + speed control
- + mechanical obstacles
- + aquaplaning
- + system control
- + concept development

DEFINE THE TASK

Our modular system keeps everything ready for your individual requirements.

Sprinkler irrigation circle
e.g. with ESS Evertz Standard Sprayer or EVS Evertz Vario Sprayer (patented)

Sprinkler irrigation handling course
e.g. with ESS Evertz Standard Sprayer or EVS Evertz Vario Sprayer

Water obstacle
EWO Evertz Water Obstacle

Dynamic skid plate
for car / truck training

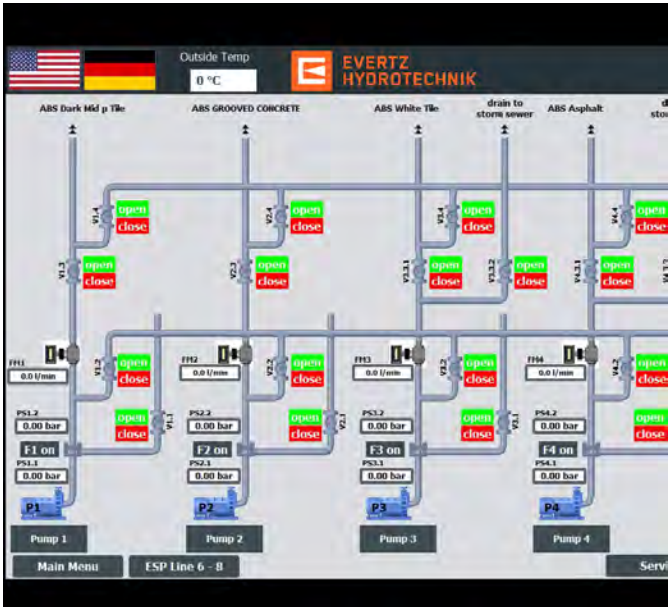

Line irrigation
e.g. with EFD Evertz Flow & Drain

Overflow channel
EOC Evertz Overflow Channel for even irrigation e.g. of hill tracks

Pump station
equipped with all features

System control
e.g simple ON / OFF control or visualisation of the complete plant

ENGINEERING, LAYOUT & SERVICE WORLDWIDE

- ▶ With our long-time know-how and the industrial access from the water hydraulic, the efficiency and durability of our systems are in the first place.
- ▶ With our own development and patented products, almost every customer demand can be fulfilled with the help of a modular system - 100 % customized! This underlines our exceptional position in this industry.
- ▶ With our worldwide service, we fully support you throughout the entire life cycle of your system.
